

Dhruv Malusare

JAVA FULL STACK DEVELOPER

Backend-focused Java developer specializing in Spring Boot, Microservices Architecture, Secure REST APIs, and AI-integrated systems.

Vadodara | +91 9725296723 | dhruvmalusare13@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Java Full Stack Developer experienced in building secure and scalable backend systems using Spring Boot and Spring Security. Strong knowledge of JWT-based authentication, Microservices Architecture, API Gateway routing, and layered system design. Hands-on experience integrating external AI APIs and implementing modular execution workflows using design patterns. Focused on clean code, maintainable architecture, and production-ready backend development.

EDUCATION

Bachelor of Computer Applications (BCA)

Shri D.N. Institute of Computer Application

2022 – 2025 | CGPA: 8.00 / 10

PROJECTS

Agentic AI Platform

- Developed AI-integrated backend using Spring Boot for structured response generation.
- Integrated Gemini API using WebClient for secure external API communication.
- Designed modular execution workflow (Planner → Executor → Response Strategy) using Strategy Design Pattern.
- Implemented fallback handling for API failures and rate limits.
- Configured secure environment-based API key management.

Tech: Java, Spring Boot, WebClient, REST API

GitHub: [GitHub Link](#)

Secure Task Manager API

- Developed 12+ RESTful endpoints using Spring Boot.
- Implemented JWT authentication and role-based access control (Admin/User).
- Designed layered architecture (Controller–Service–Repository).
- Implemented Global Exception Handling using @ControllerAdvice.
- Applied BCryptPasswordEncoder for secure credential storage.
- Implemented DTO-based validation and request mapping.

Tech: Java, Spring Boot, Spring Security, JWT, JPA, MySQL

GitHub: [GitHub Link](#)

School–Student Microservices System

- Built independent School and Student services using Spring Boot.
- Implemented Eureka Server for service discovery.
- Configured Spring Cloud API Gateway for centralized routing.
- Enabled service-to-service communication using Feign Client.
- Secured APIs using JWT authentication.

Tech: Spring Boot, Spring Cloud, API Gateway, Eureka, Feign Client, MySQL

CERTIFICATION

Java Full Stack Developer Certification | Tops Technologies | 2025

- Completed hands-on training in Core Java, OOPs, Collections Framework, and JDBC.
- Developed RESTful APIs using Spring Boot and Spring Data JPA.
- Implemented authentication and authorization using Spring Security.
- Built Microservices using Eureka Server, API Gateway, and Feign Client.
- Developed responsive user interfaces using HTML, CSS, and JavaScript.

TECHNICAL SKILLS

- **Programming:** Java 17, OOPs, Collections Framework, Exception Handling, Multithreading (Basics)
- **Backend Development:** Spring Boot, Spring MVC, Spring Security, JWT Authentication, RESTful APIs, Layered Architecture (Controller–Service–Repository), DTO Mapping, Global Exception Handling
- **Microservices Architecture:** Eureka Server, Spring Cloud API Gateway, Feign Client, Service-to-Service Communication
- **Reactive & API Integration:** WebClient, External API Integration, Fallback Handling
- **Frontend Development:** HTML5, CSS3, JavaScript (ES6), Responsive Design, Form Validation, Basic React
- **Database & ORM:** MySQL, JPA, Hibernate, CRUD Operations, Database Design
- **Security:** Authentication & Authorization, BCrypt Password Encoding, Role-Based Access Control
- **DevOps & Deployment:** Docker (Basic Image Creation & Containerization), Jenkins (CI/CD Pipeline Basics)
- **Tools:** Git, GitHub, Maven, Postman, Environment Variable Configuration
